My Fertility

Ember / JS / MySQL / Redis
Rails

Ingenious joined MyFertility to challenge the status quo.

The objective, to design a platform that simplifies the intended parents experience, and empower the fertility doctors with the right information at the right time.

Denver Health

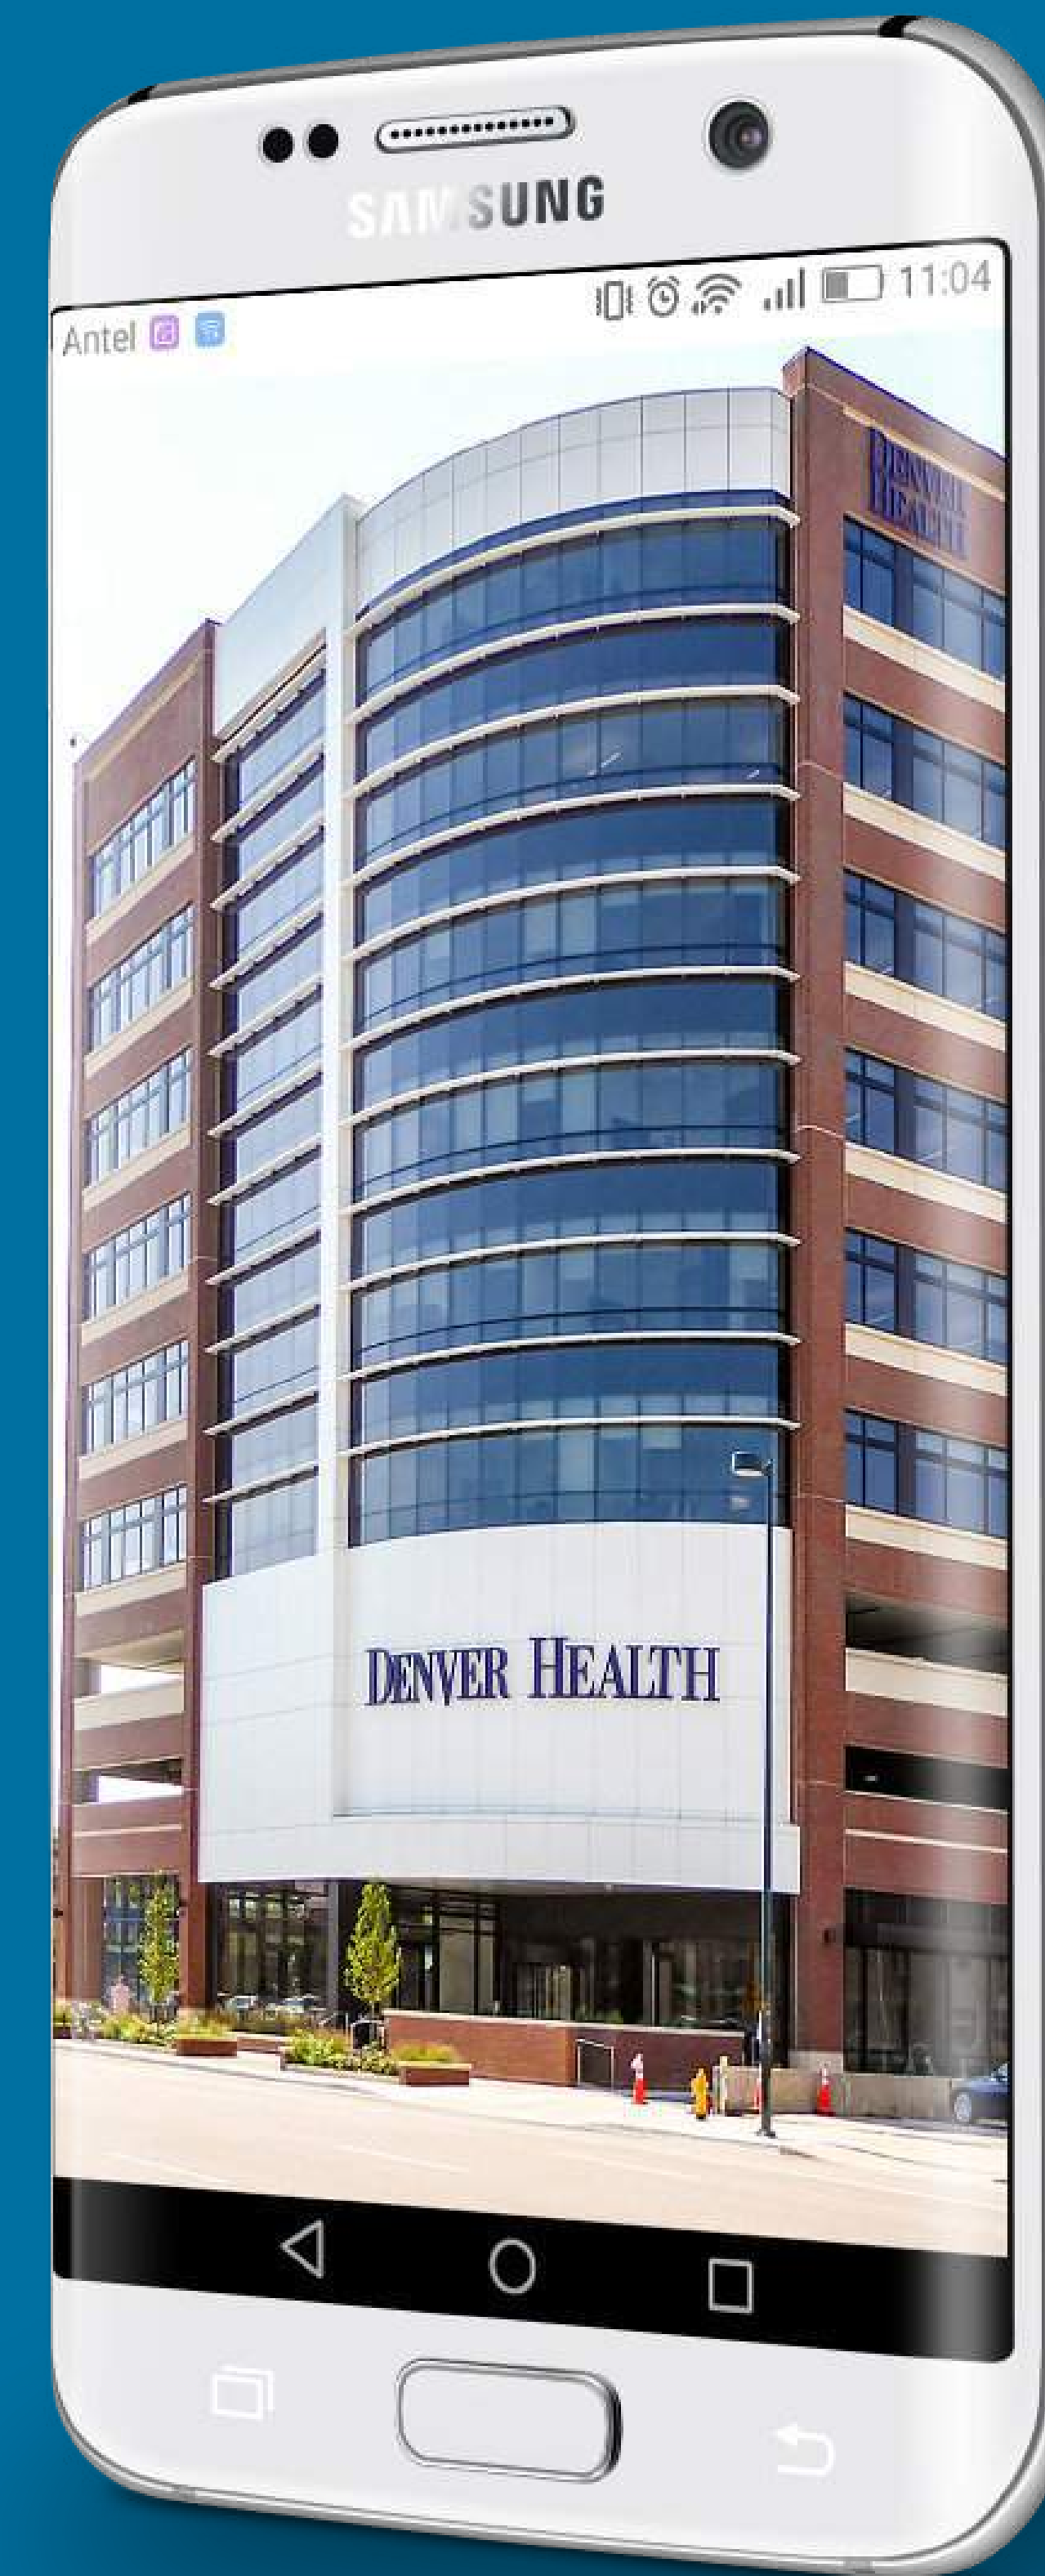

▶ .net core / React / Redux / Redux Saga
Immutable JS

Denver Health is one of the most important medical centers in the United States. Thousands of people flock annually waiting for the most appropriate solutions to recover their health and live better.

The challenge for Denver Health was to build an online, offline first web-based solution that helps doctors diagnose people in the emergency room.

NINJILITY

NINJILITY Ninjility is a heightened development agility te-of-the-art testing tools and ets.

to achieve ninjility can be seen delivery cycles and setting new duct quality and testing

QUEST

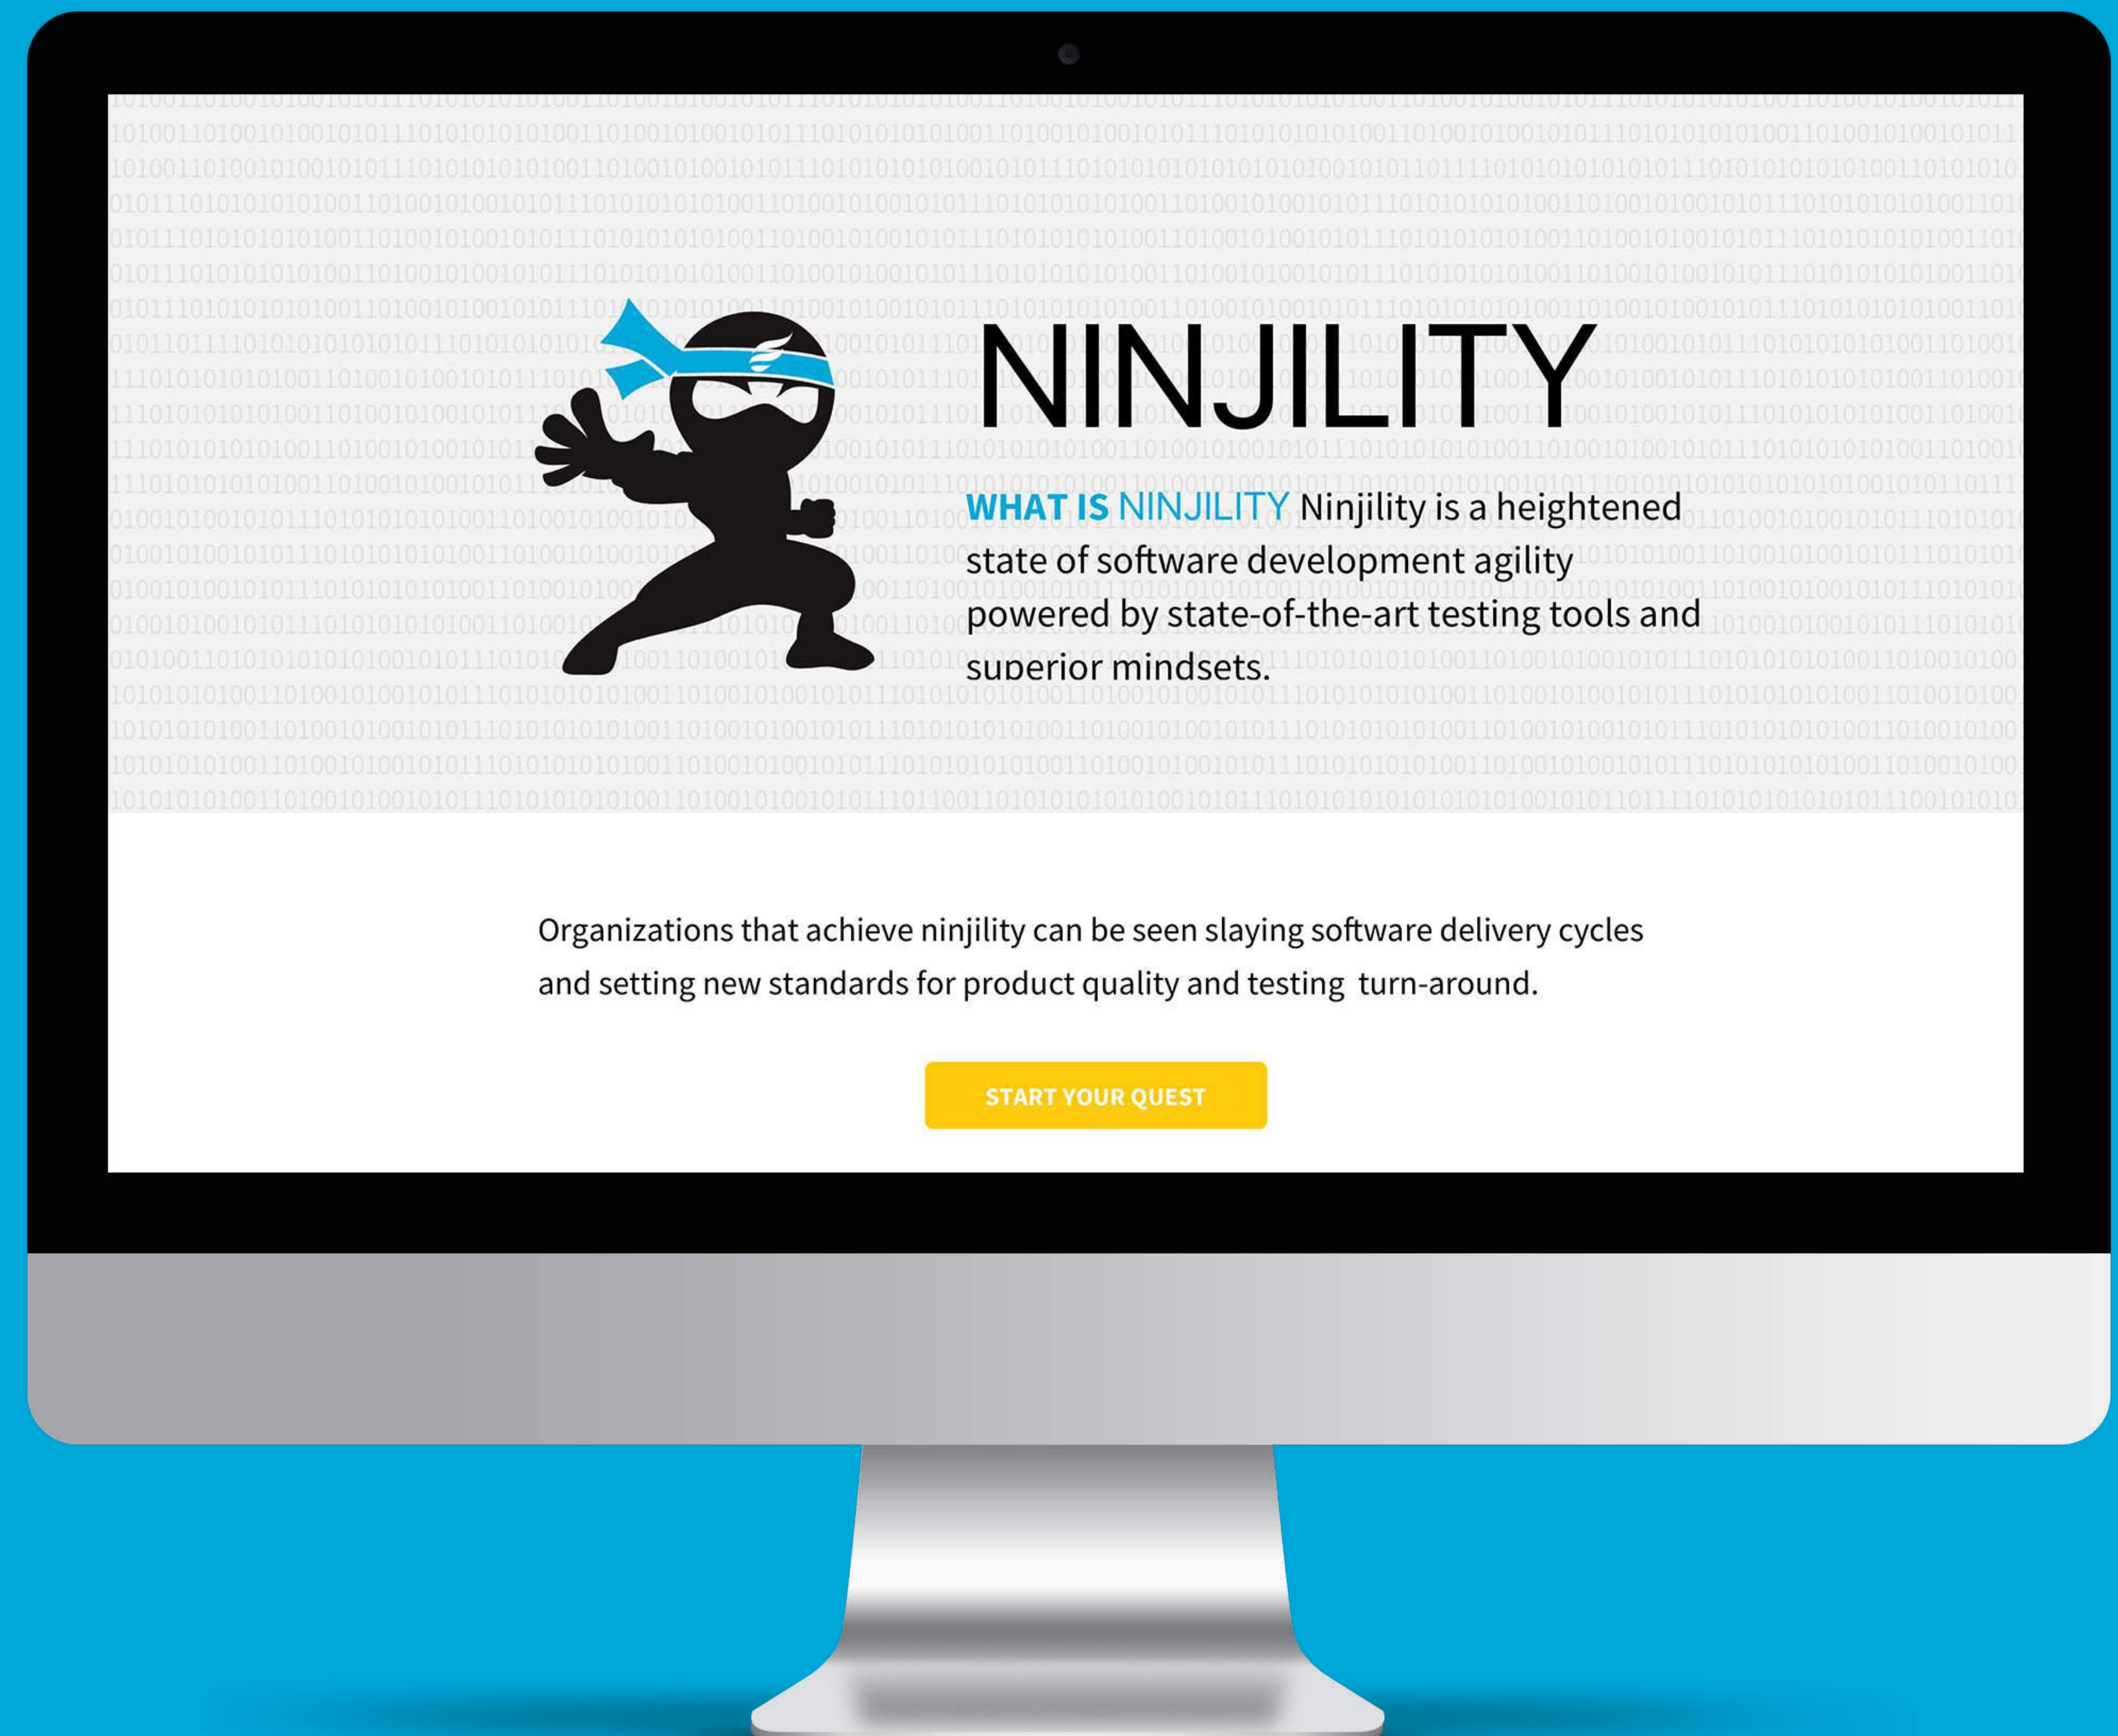

Ninjility

► Rails / React / CSS
Emotion JS

Ninjility is a marketing tool focused on measuring what's your organization agility level. Users are presented with a questionnaire and depending on the responses the app lets you know in which state of the agile methodology is your organization. The tool is a core part of the Zephyr marketing & communication team, and it's used in all Zephyr sponsored events to gather feedback and to know which Zephyr services each individual needs.

Infigo

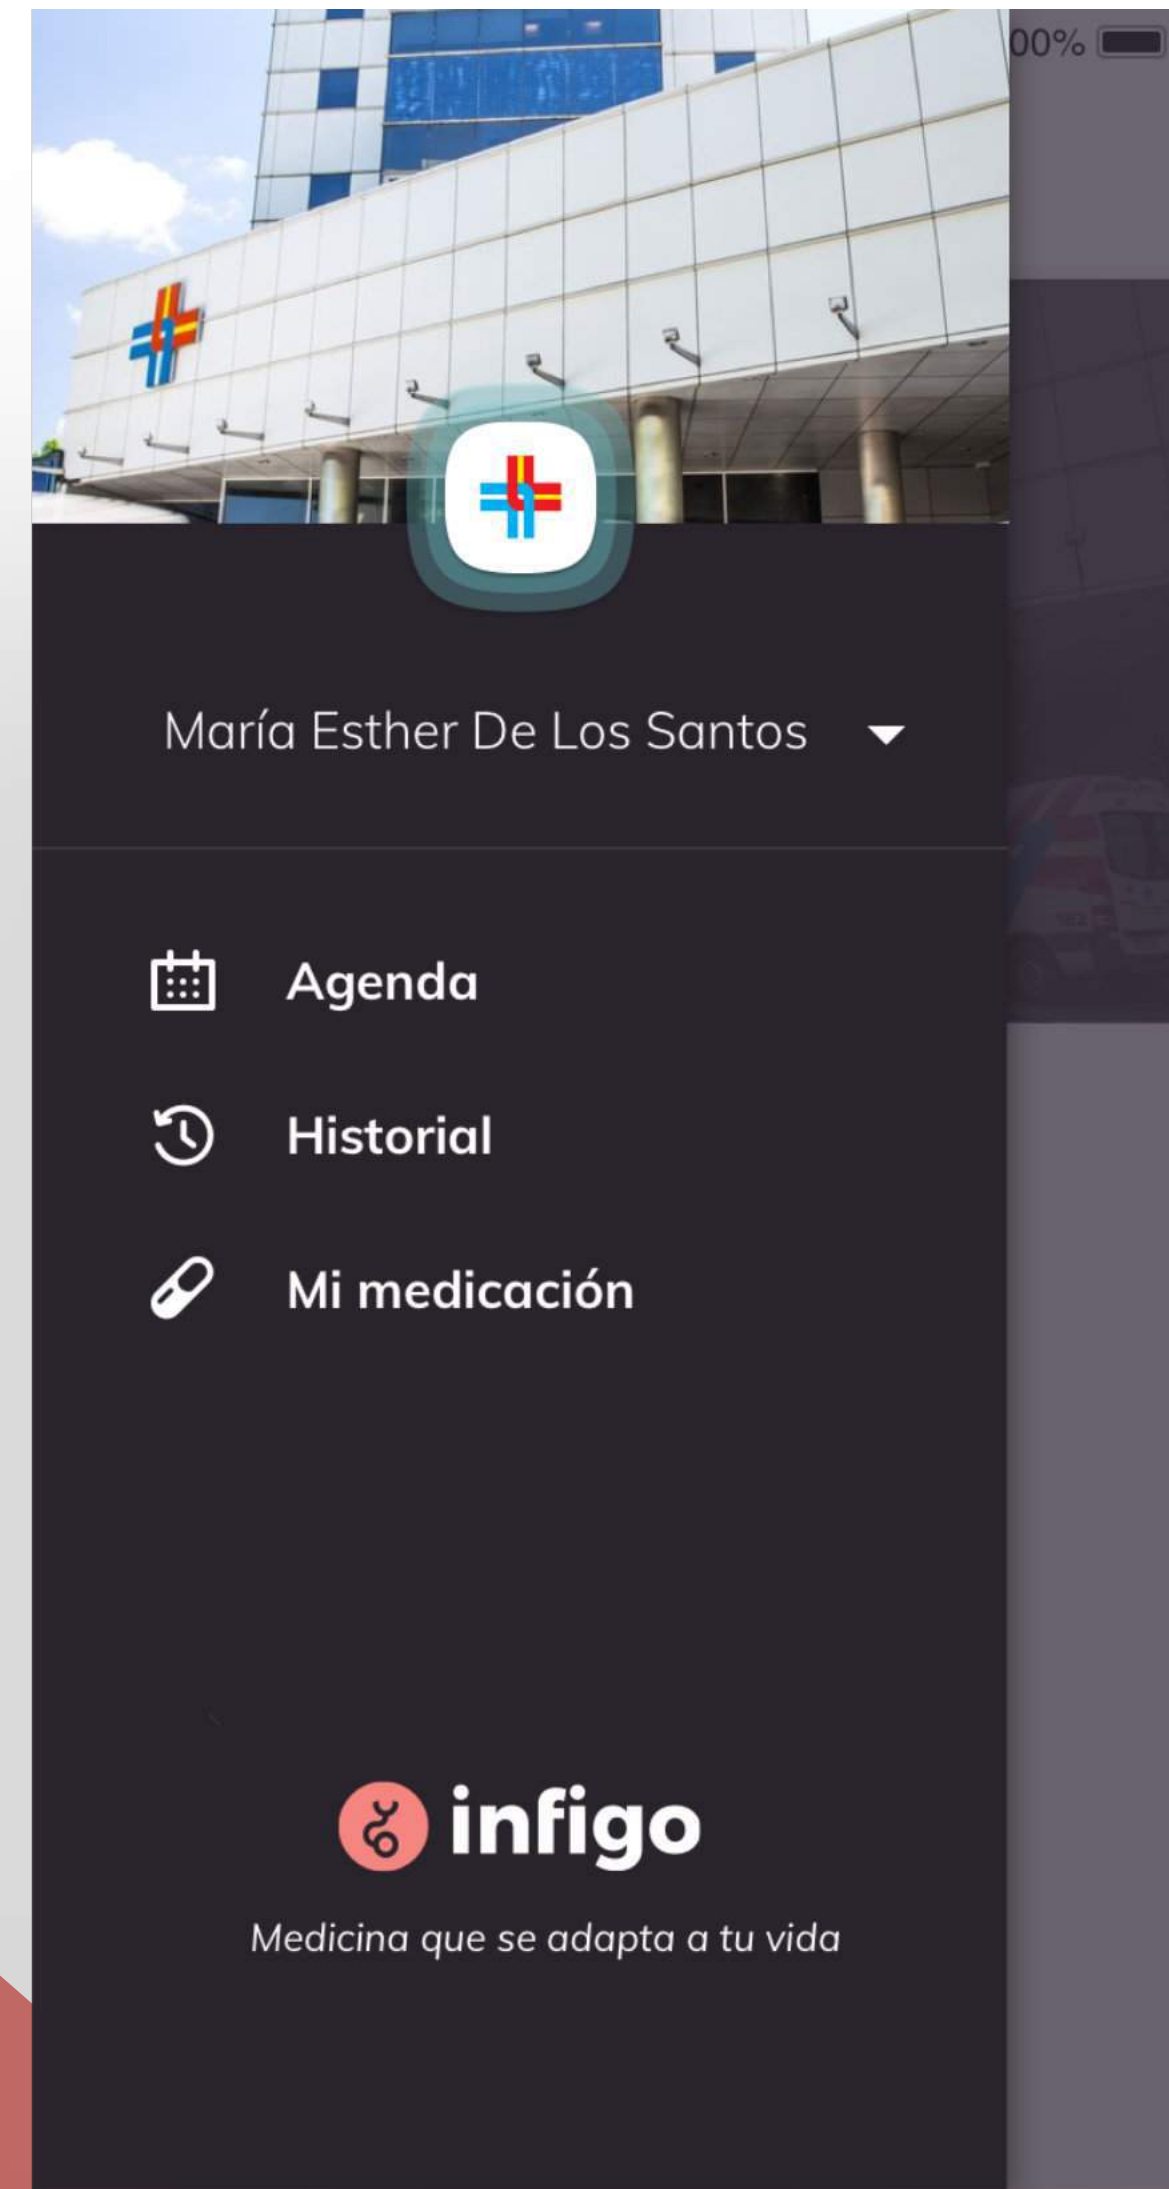

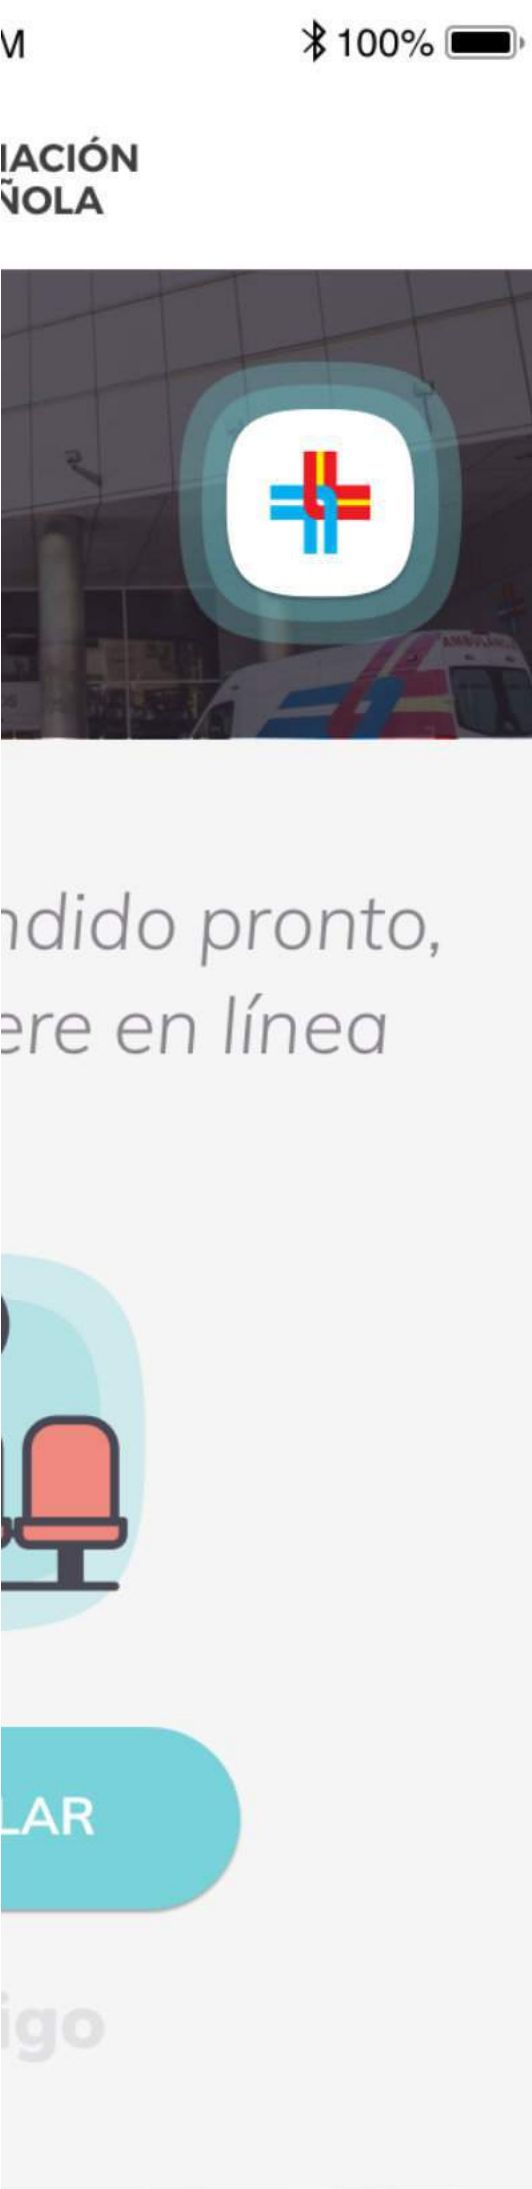

node / Hapi JS / React Native / Mobx
State Tree / WebRTC

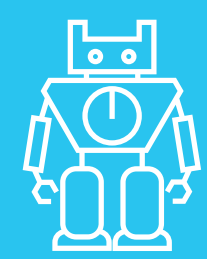

Infigo is a still on development platform that allows the interaction between patients and doctors. The primary purpose of the company is to enable patients to receive better healthcare through technology. The challenge for Infigo was to build a single application that works for Android and iOS and to reuse as much code as possible.

<http://ingenious.agency>

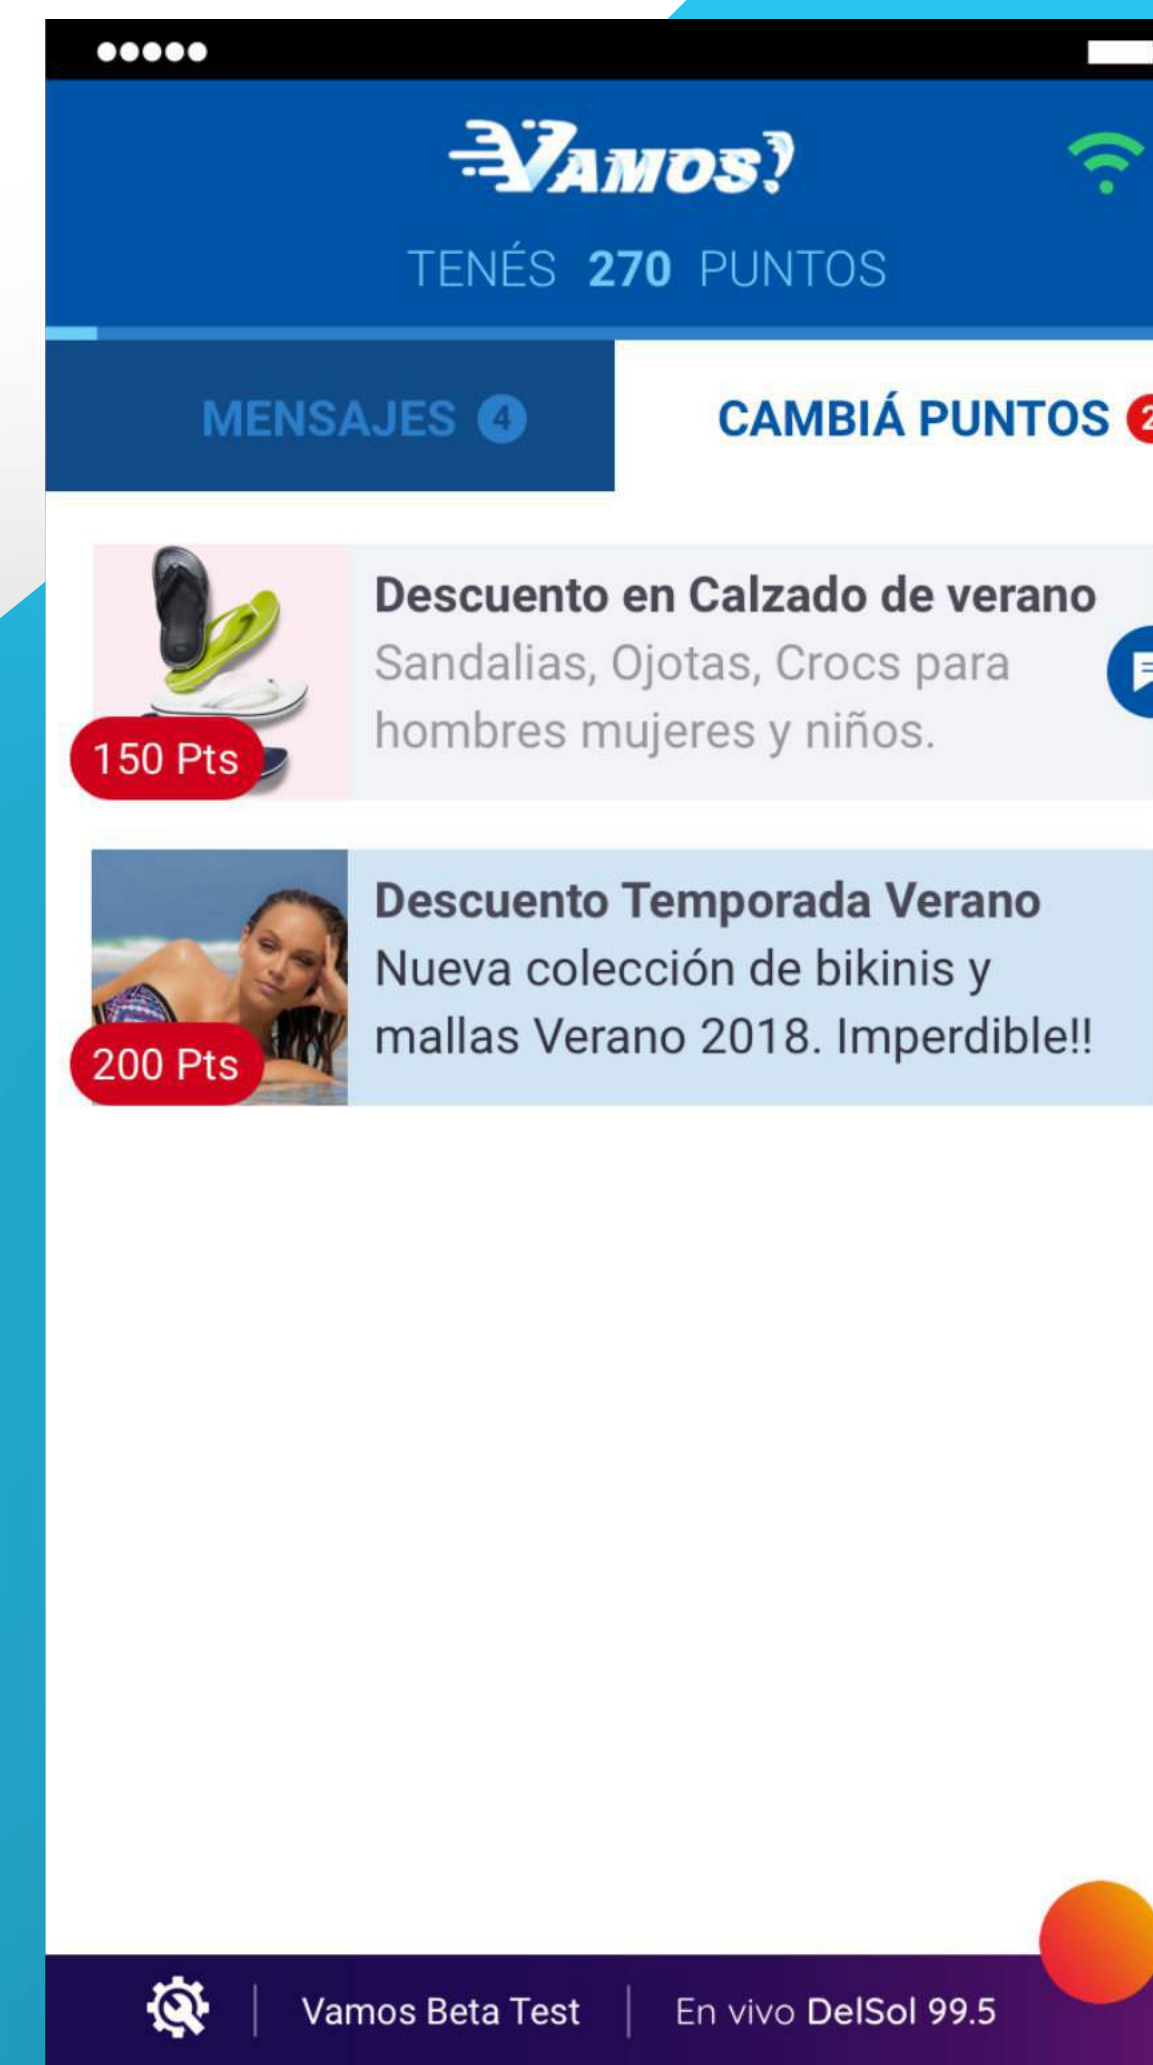

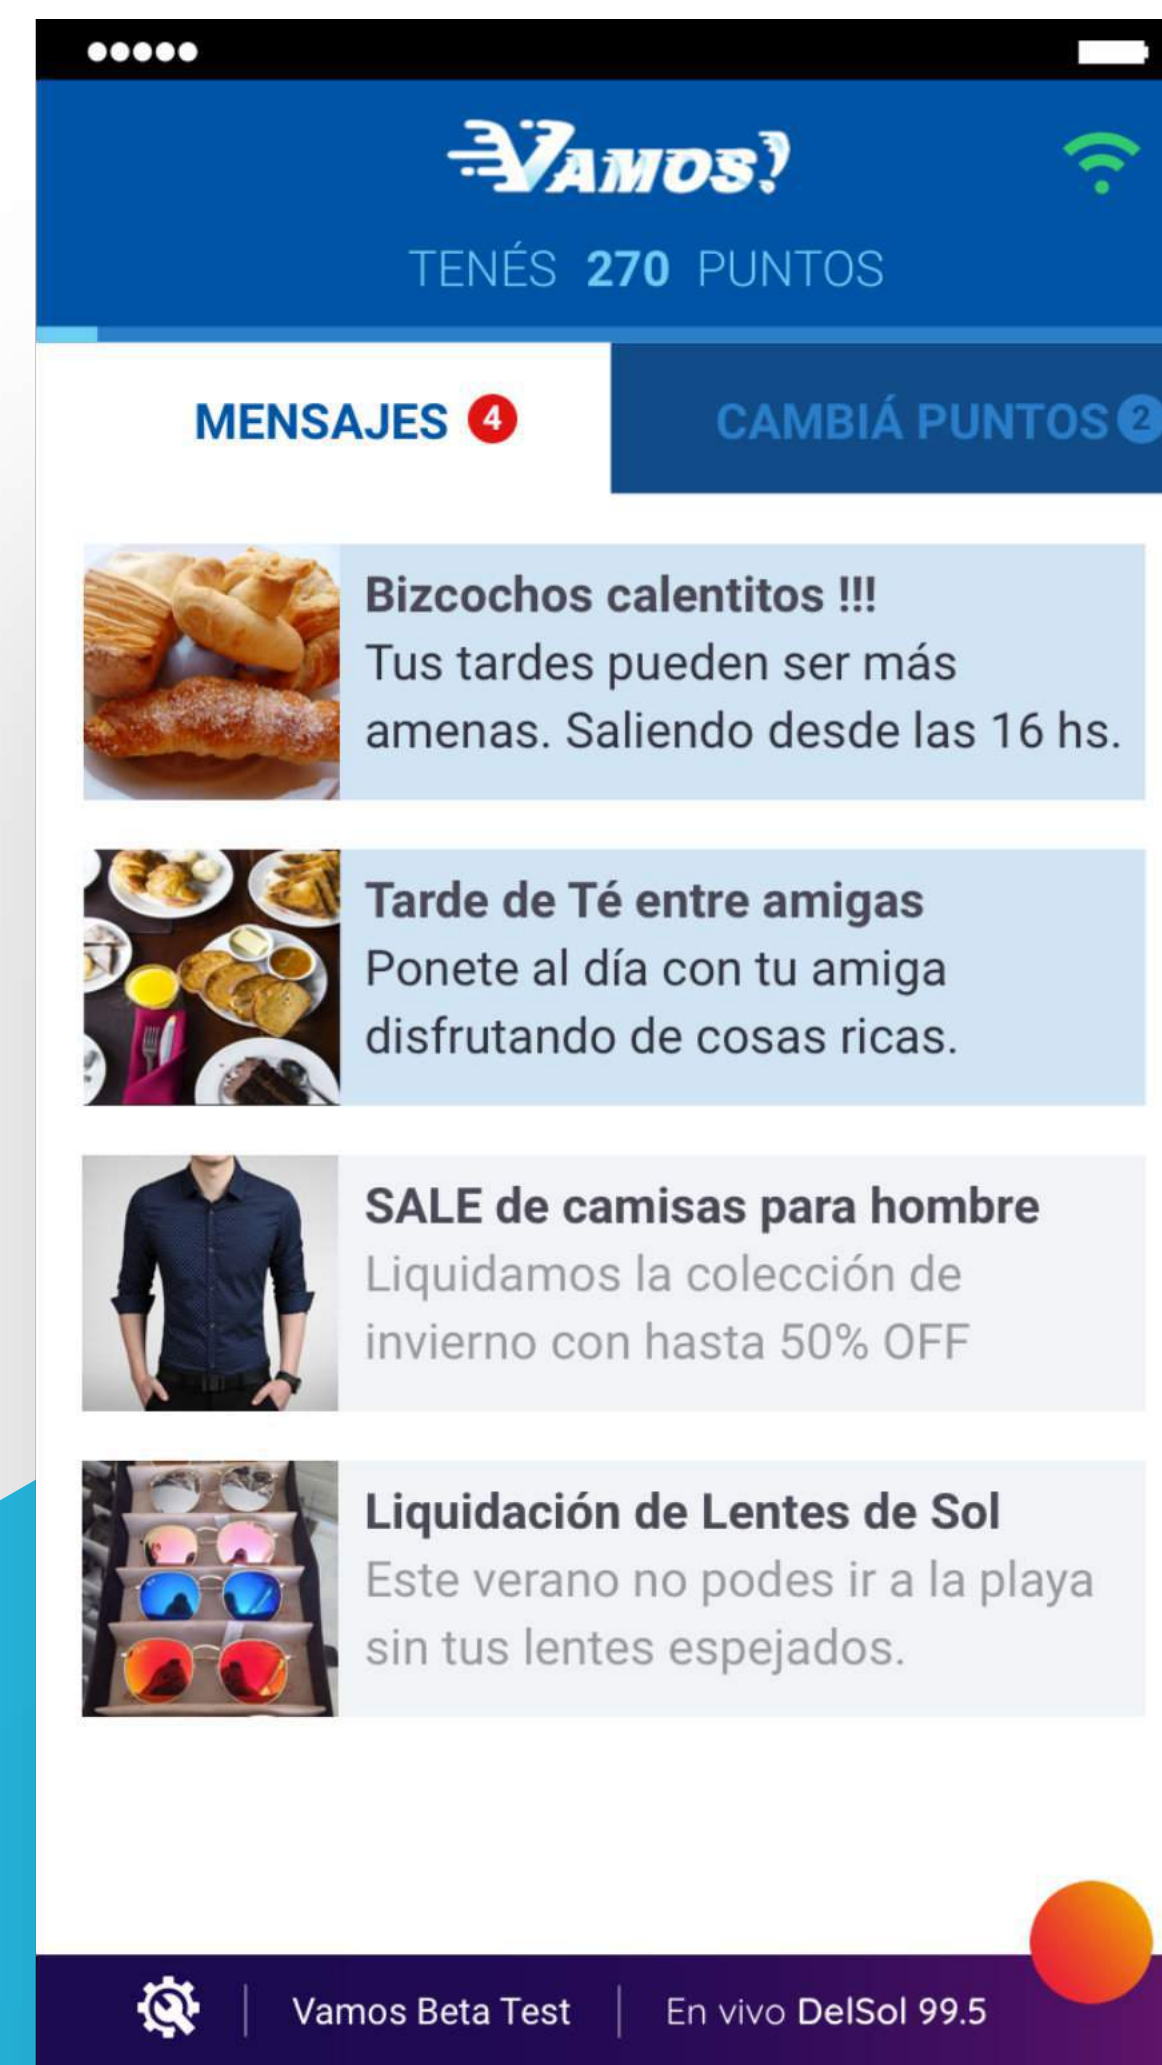

Vamos!

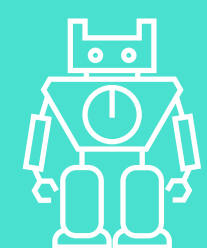

node / Moleculer / Docker / Dynamo DB /
Redis / Preact / React Native / AWS

Vamos! is the application that provides free WiFi to the users of public transportation in Montevideo (+1000 buses). The application allows registered users to consume the bus WiFi; in exchange the app tracks data (anonymously) in real time like where the bus is and where users disconnect from the network to send ad campaigns to them in the form of push notifications and app purchases and promotions.

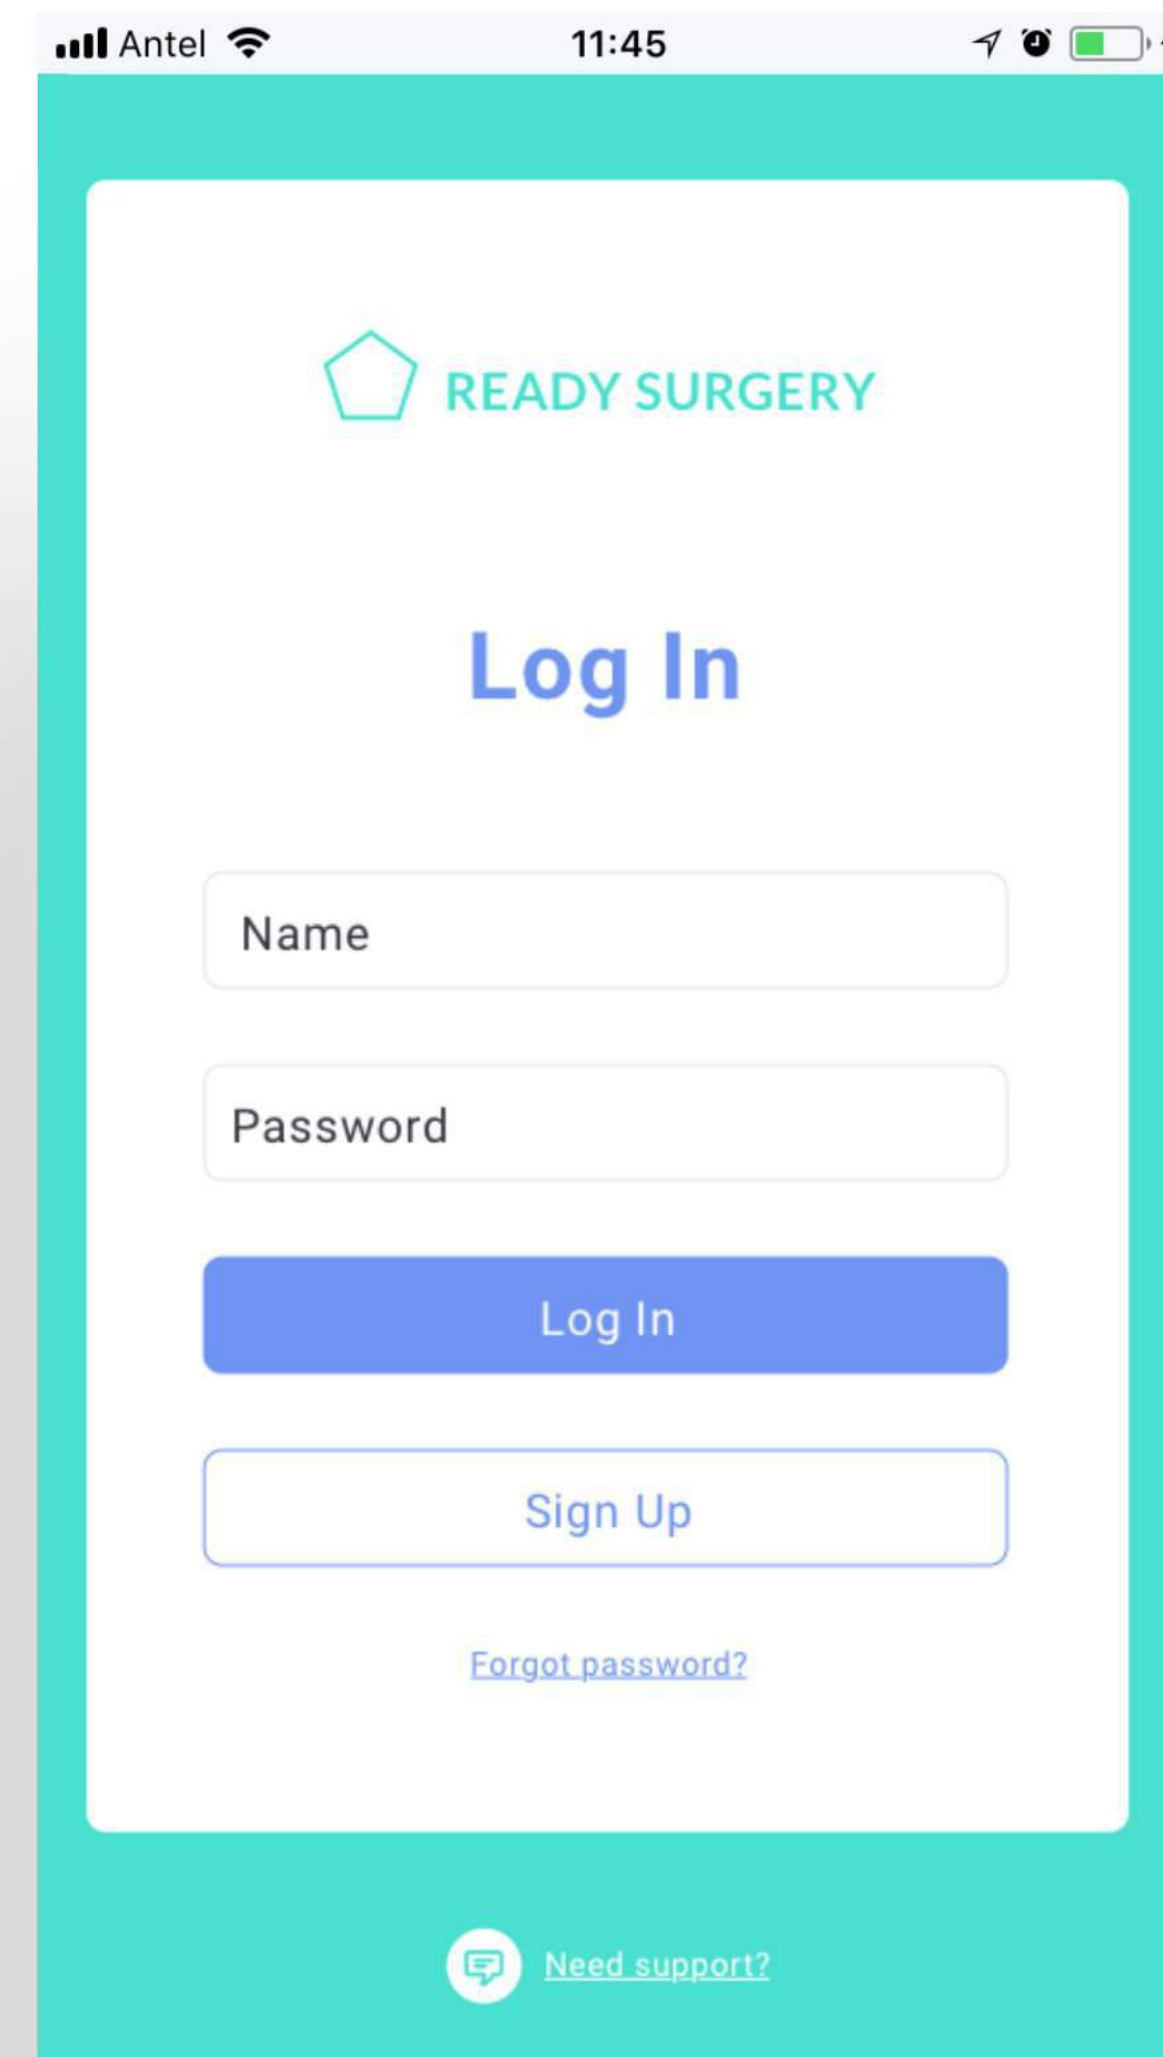

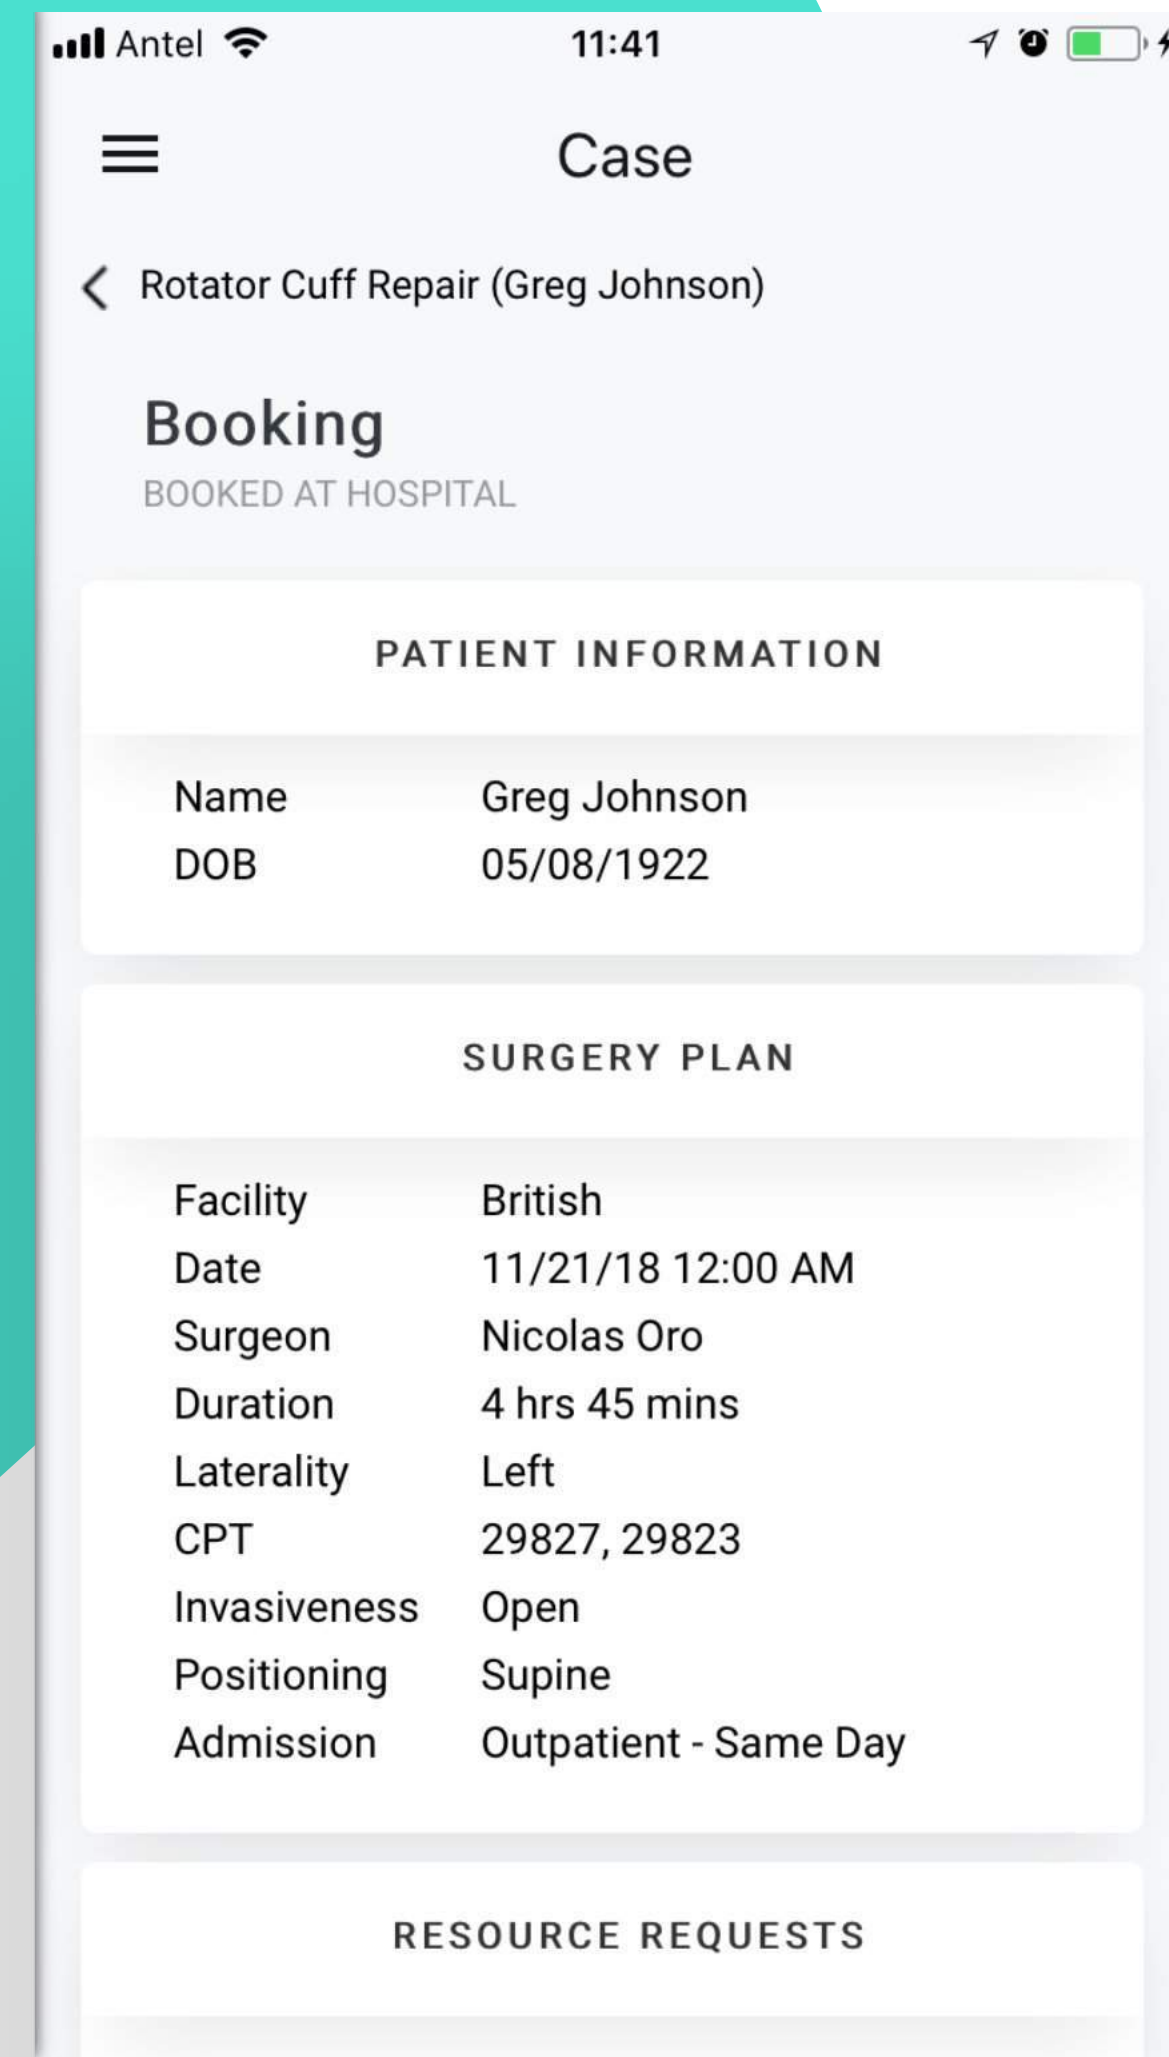

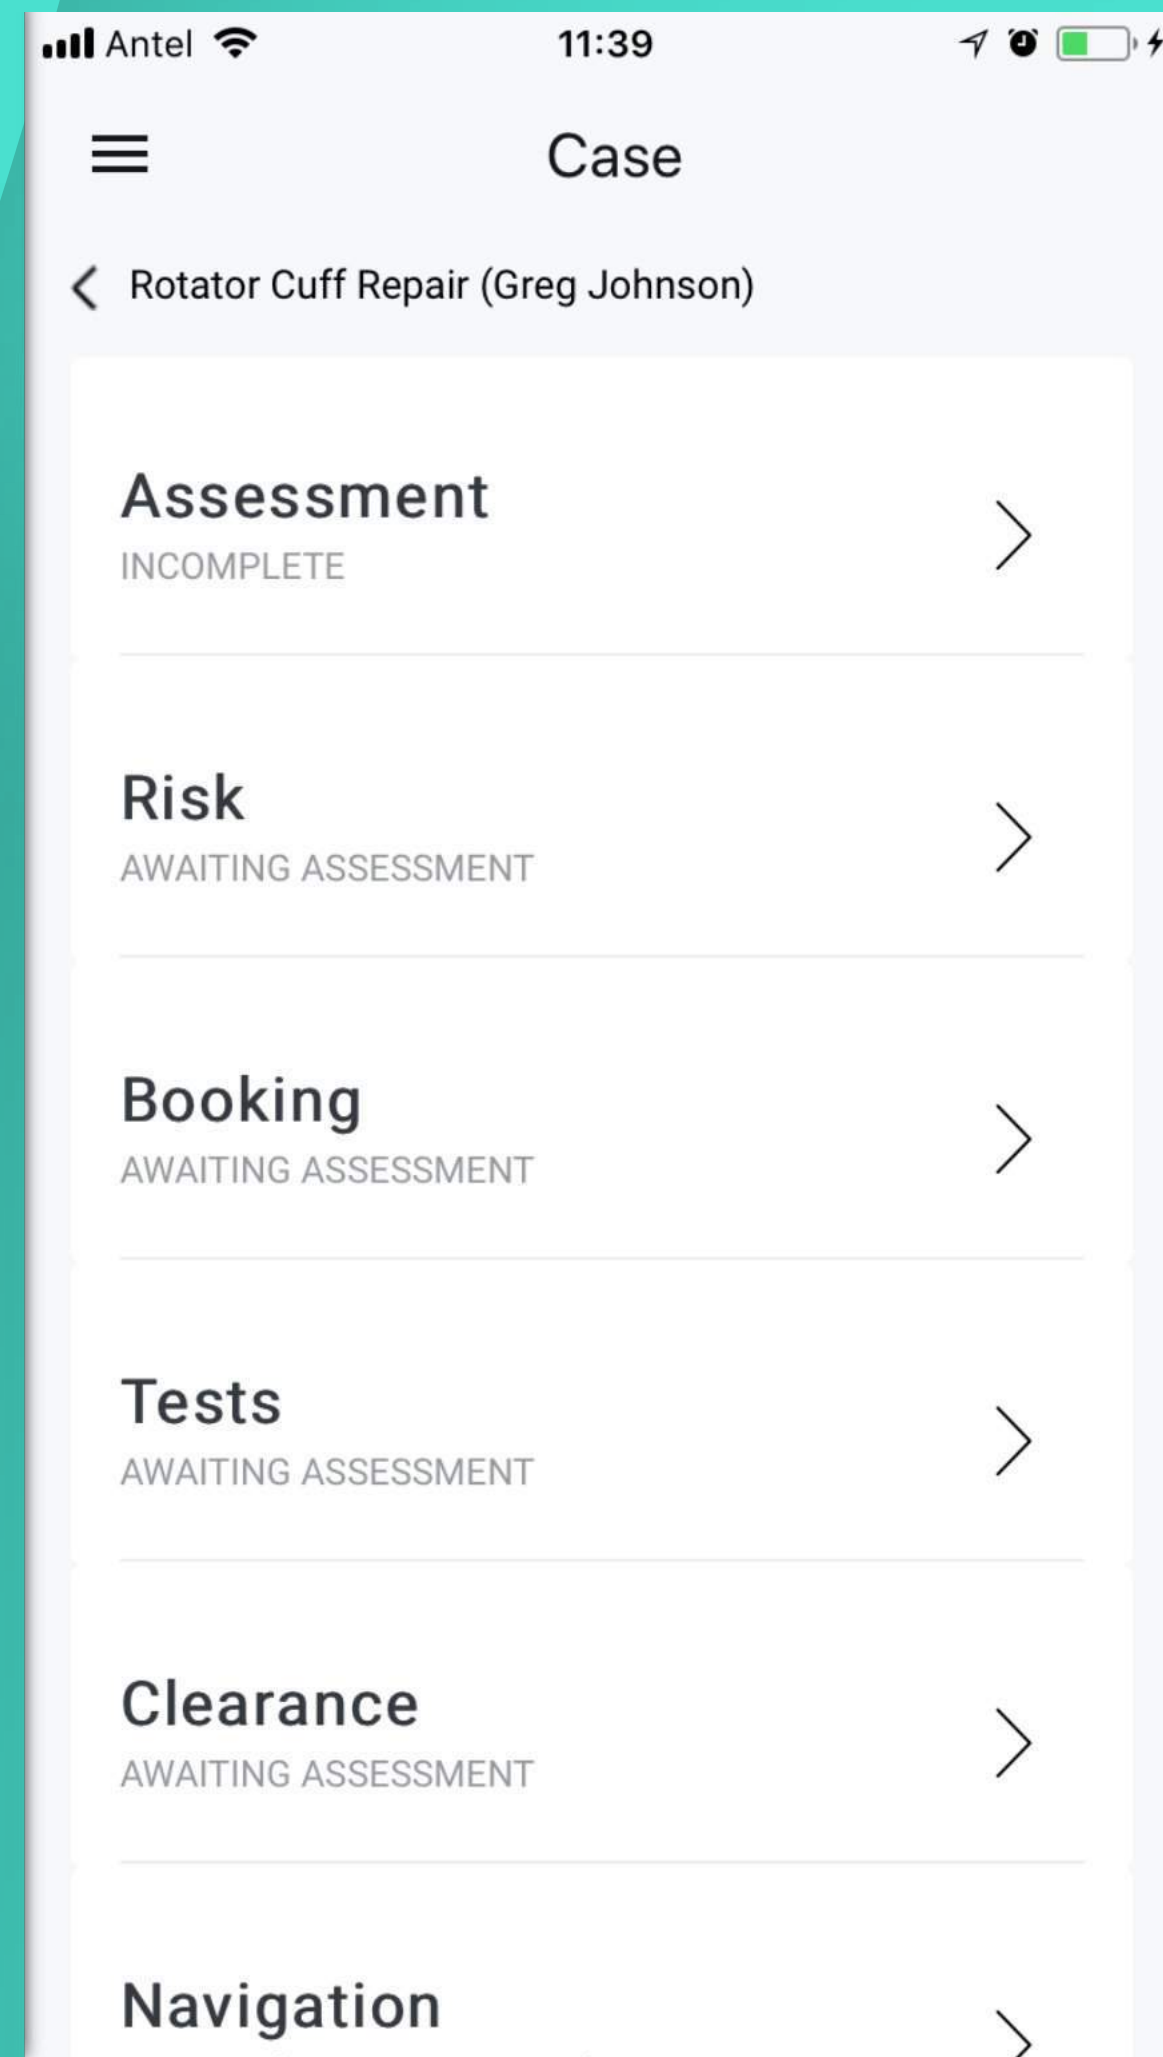

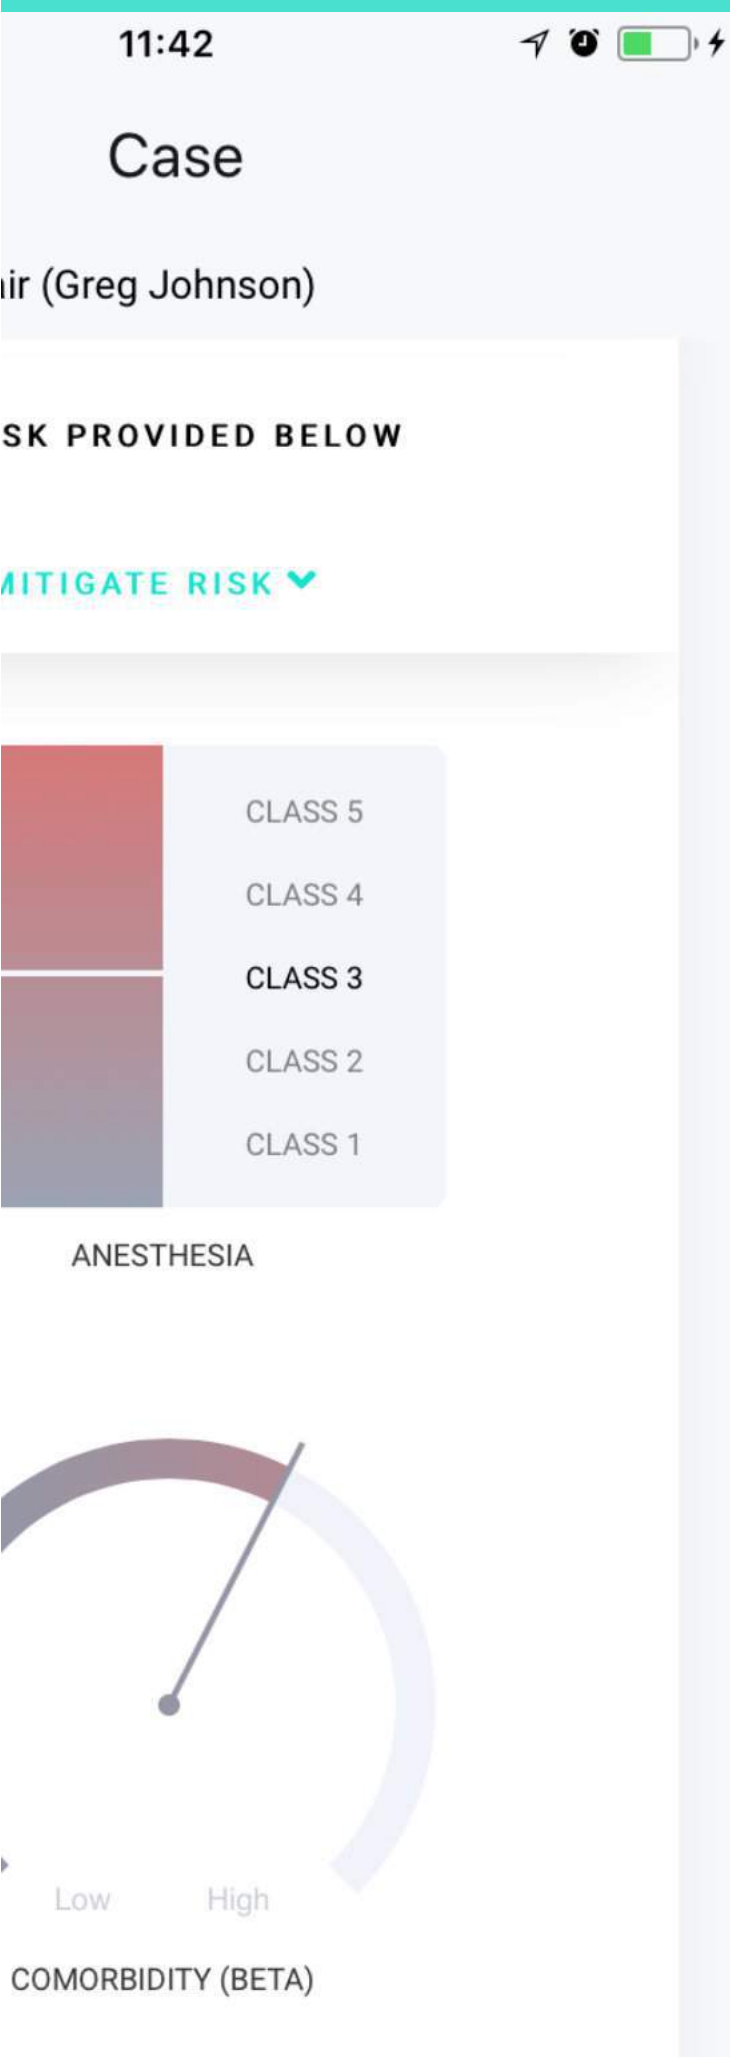

Ready Surgery

React Native / React / Meteor JS
Mongo DB

Ready Surgery it's an app that provides scientific risk intelligence for surgical care that uses data science to avoid complications and readmissions.

Great things in business
are never done by one person.
They're done by a team
of people.

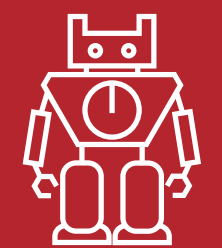

MVPs.
